Orthodox Christianity has understood that God created the universe out of nothing (ex nihilo). Creating simply by divine fiat, God needed no pre-existent materials. This view of creation strongly supports the doctrine of God’s omnipotence. Mormonism, however, rejects creation out of nothing. God is merely an Artificer or Shaper or Organizer of eternal matter. According to F. Kent Nelson and Stephen D. Ricks, the LDS understanding of creation “differs from both scientific and traditional Christian accounts” in that it recognizes creation “as organization of preexisting materials, and not as an ex nihilo event.”

Mormons often claim that Christians imposed the doctrine of creation ex nihilo on Scripture. LDS theologian B. H. Roberts declared that “Christians converted into dogma the false notion of the creation of the universe out of ‘nothing,’” assuming God’s transcendence of the universe. They accepted the idea that ‘creation’ meant absolutely bringing from non-existence into existence, and ultimately pronounced anathema upon those who might attempt to teach otherwise. The influence of Greek philosophy on the early church Fathers is an oft-cited reason for “theological add-ons” such as creation out of nothing.

In an energetic but ultimately failed effort to defend the LDS position on “creation from [eternally] preexisting matter,” Stephen D. Ricks classifies the defense of creation out of nothing as a doctrine that emerged significantly later in church history. He claims that it is still “fiercely maintained by fundamentalist Protestants (who continue to rigorously exclude Latter-day Saints from Christianity because Latter-day Saints affirm a belief in the existence of matter before the creation).” He condescendingly speaks of the defense of creation ex nihilo as the “rearguard actions by theological enthusiasts, members of great ‘yawning’ associations, and participants in meetings of societies of Christian philosophy.”

My recently coauthored Creation Out of Nothing: A Biblical, Philosophical, and Scientific Exploration exposes such remarks by Ricks as grossly inaccurate. The LDS position itself is difficult to square with Scripture and its implications. I can only summarize the remarkable supports from creation out of nothing from the OT and NT. I do not have space to explore the relevant extrabiblical Jewish and Christian writings (the Dead Sea Scrolls, apocryphal and pseudepigraphal writings, early church fathers, rabbinic sources, and medieval Jewish exegetes). In many of them we observe a consistent two-fold pattern: (1) constant assertions of God’s unique unbegottenness (agnētōs); all else, including matter, is begotten (gennētōs); and (2) a two-stage ex nihilo creation, in which God first creates any...
substrates—water, matter, etc.—and then shapes and orders them into an orderly cosmos.⁵

In this essay, I shall explore the Mormon doctrine of creation, contrasting it with the Christian view. Then I shall present the Old Testament (OT) evidence for creation out of nothing followed by the New Testament (NT) evidence.

Creation and LDS Theology

Let us first briefly look at the LDS Scriptures (which are binding upon Mormons) and secondary writings (which carry authoritative weight but are not strictly canonical) to see what they have to say regarding the nature of creation. The Book of Mormon declares that “there is a God, and he hath created all things, both the heavens and the earth, and all things that in them are” (2 Nephi 2:14; cf. Mosiah 4:9; 2 Nephi 11:7; Helaman 14:12). The early sections of the Doctrine and Covenants use similar language (e.g., D&C 14:9 [1829] and 45:1 [1831]). In the Book of Abraham (1842), however, we read that God created from pre-existing material—that is, the Gods went down and “organized and formed the heavens and the earth” (4:1). Creation is simply organization of pre-existing elements.

In addition to these writings, Joseph Smith and other Mormon spokesmen—both early and contemporary—have articulated the idea of creation as reorganization. In the King Follett Discourse (6 April 1844), Smith declared that the “pure principles of element are principles which can never be destroyed: they may be organized and re-organized, but not destroyed. They had no beginning, and can have no end.”⁹ Brigham Young, Smith’s immediate successor, similarly declared that God created from an “eternity of matter” and “when He speaks, He is obeyed, and matter comes together and is organized.”¹⁰

The recent Encyclopedia of Mormonism asserts that creation is “organization of preexisting materials,”¹¹ Mormon thinker Lowell Bennion avers, “Latter-Day Saints reject the ex nihilo theory of creation. Intelligence and the elements have always existed, co-eternal with God. He is tremendously creative and powerful, but he works with materials not of his own making.”¹² Stephen E. Robinson holds a similar view.¹³

This, of course, clashes with Scripture—not simply Christian creeds (which Mormons reject). The biblical writers see God as ontologically distinct from His creation. God and what He has brought into existence constitute all the reality there is. God alone is everlasting and immortal; all else (God’s creation) is contingent and exists only by God’s sustaining power, which excludes eternal matter. There are two main features to the doctrine of creation out of nothing: All things are ontologically dependent upon God for their continued existence in being the universe and all other reality apart from God began and has not always existed.¹⁴

True, some Christian theologians believe creation is nothing more than ontological dependence (i.e., God’s providential sustenance of all existing things, preventing them from lapsing into nonbeing);¹⁵ temporal origination is ultimately (or largely) irrelevant.¹⁶ However, this view of creation does not capture the thrust of this key Christian doctrine, which declares that God is distinct from all other reality, which He not only sustains but also brought into being a finite time ago. So for Christians, creation more properly includes both the temporal origination
and ontological dependence of the material world on God’s decree.17

Old Testament Support for Creation Out of Nothing

German theologian Gerhard May, whom LDS scholars like to cite, admits that the idea of creation out of nothing “corresponds factually with the OT proclamation about creation”18 Yet, he claims that the doctrine is not demanded by the text.19 Upon closer examination, however, a solid case can be made for creatio ex nihilo in the OT—that it is indeed demanded by the text. When we consider all the relevant factors, there simply is no other plausible, consistent way to read the biblical text.

That said, the OT case for creation ex nihilo is a cumulative one, not relying upon one piece of evidence alone but upon a number of mutually-reinforcing elements. When we combine them, the case for creation out of nothing is quite strong.

Genesis 1 and Ancient Near East Cosmogonies

The ancient Babylonian “creation epic” Enuma elish and other Ancient Near East (ANE) cosmogonies (which speak of the world’s origin), despite what is commonly claimed, are remarkably different from Gen 1. Mesopotamian cosmogonies, for instance, are intertwined with theogonies—accounts of the gods’ origins. In them, we are not told so much about how the universe came about—the origin of the worlds is really accidental or secondary in ANE accounts—but how the gods emerged. Furthermore, when it comes to the elements of the universe (the waters/deep, darkness), a deity either controls one or is one.20 As Umberto Cassuto puts it, the ANE creation epics tell about the origin of the gods who came before the birth of the world and human beings. They speak of “the antagonism between this god and that god, of frictions that arose from these clashes of will, and of mighty wars that were waged by the gods.”21

However, writing with an awareness of such rival, polytheistic cosmogonies, the monotheistic author of Genesis 1 deliberately rejects them.22 In ANE cosmogonies, deities struggle to divide the waters whereas Yahweh simply speaks and thereby creates all things, including astral bodies (which are not gods, as in ANE accounts, but creations).23 As Rolf Rendtorff points out, even the darkness and the waters are elements of creation (cf. Isa 45:7).24 Gerhard von Rad makes the powerful point that Israel’s worldview, as is reflected in Genesis, drew a sharp demarcating line between God and the world. The material world is purged of any reference to the divine or the demonic.25 Ugaritic scholar Mark S. Smith notes this: “These cosmic monsters [darkness, deep, chaos] are no longer primordial forces opposed to the Israelite God at the beginning of creation. Instead, they are creatures like other creatures rendered in this story.”26 Genesis 1 depicts a “divine mastery” over these forces, which are “depersonalized” and “domesticated.”27 As James Barr notes, the theomachies (divine warrings) and polytheism of the ANE are a sharp contrast to Gen 1, which is “magnificently monotheistic.”28 And regarding ontology or being, in Genesis (unlike ANE accounts), the created world does not somehow emanate from Yahweh as an “overflow of the essence of deity, but rather an object.”29

John Walton says that the similarities between Mesopotamian cosmogonies and the Bible are superficial rather than substantial: “it is difficult to discuss compli-
sons between Israelite and Mesopotamian literature concerning creation because the disparity is so marked.” The key differences Walton sees are (1) theogony vs. cosmogony, (2) polytheism vs. monotheism, and (3) organization vs. creative act. Additionally, there is a difference in style, not only content. Kenneth Kitchen has pointed out the contrast between the simple creation account in Genesis and the more elaborate ANE creation epics. As a general rule of thumb, the simpler the earlier: “simple accounts or traditions may give rise (by accretion or embellishment) to elaborate legends, but not vice versa.”

**Genesis 1:1 as Absolute Rather Than Construct**

A not-uncommon view of Genesis 1 is that it was influenced by *Enuma elish* and other ANE epics which do not present an absolute beginning. Indeed, such a perspective has affected how Gen 1:1 itself is understood in some recent translations (“In the beginning of creation, when God made heaven and earth, the earth was without form and void” [NEB]—although this was recently revised to an absolute rendering in the REB translation). Allegedly, because “beginning” does not have an article preceding it (possibly suggesting “in a beginning”), it is not absolute but temporal. Such temporal renderings of Gen 1:1-2 imply that there is no absolute beginning to creation—something Mormons seize upon since this *could* imply that primordial matter existed eternally and was organized by God. If Gen 1:1 is a dependent clause, then the first thing God creates is light, not heaven and earth (i.e., the universe).

There have been four views on how to interpret Gen 1:1:

<table>
<thead>
<tr>
<th>Four views on Gen. 1</th>
<th>How Gen. 1:1 is interpreted</th>
</tr>
</thead>
<tbody>
<tr>
<td>View #1: Verse 1 is a temporal clause subordinate to the main clause in v. 2.</td>
<td>“In the beginning when God created…, the earth was without form.”</td>
</tr>
<tr>
<td>View #2: Verse 1 is a temporal clause subordinate to the main clause in v. 3 (v. 2 is a parenthetical comment).</td>
<td>“In the beginning when God created… (now the earth was formless, God said…”</td>
</tr>
<tr>
<td>View #3: Verse 1 is a main clause and serves as a title to the chapter as a whole, summarizing all the events described in v. 2-31.</td>
<td>“In the beginning God created the heavens and the earth—[and here is how it happened]….”</td>
</tr>
<tr>
<td>View #4: Verse 1 is a main clause describing the first act of creation. Verses 2 and 3 describe subsequent phases in God’s creative activity.</td>
<td>“In the beginning God created the heavens and the earth. [After he did so,] the earth was uninhabitable and desolate.”</td>
</tr>
</tbody>
</table>
A relative or temporal beginning (“in [a] beginning”—Views #1 and #2) permits the possibility of preexisting matter (although not necessarily so). An absolute reading (“in the beginning”—Views #3 and #4) presents us with a definite or absolute beginning of the universe. Victor Hamilton observes that the standard alternatives are either an eternal dualism (God and chaotic matter as co-eternal) or monotheism (God as the ultimate, eternally-existent Being). In the beginning, was there one existing entity or were there two—God and pre-existing, chaotic matter? The differences are dramatic and significant.

After surveying the relevant scholarship, Gordon Wenham asserts that “the majority of recent writers reject [the construct] interpretation.” While I cannot go into the many reasons for this, let me make these four summary points: (1) The lack of an article hardly entails a construct state (“in a beginning”) rather than an absolute state (“in the beginning”). Scholars such as Wenham, N. E. Ridderbos, James Barr, John Sailhamer, and others have shown that temporal phrases often lack an article (Isa 40:21; 41:4, 26; 46:10; cf. Gen 3:22; 6:3, 4; Mic 5:1; Hab 1:12; cf. Prov 8:23). Indeed, in Job 8:7; 42:12; Eccl 7:8; and Isa 46:10, we see this word “beginning” used in opposition to the “end.” Barr, arguing that there is no grammatical evidence that “beginning” is construct in Gen 1:1, calls such a reading “intrinsically unlikely.” The construct argument depends upon the absence of the article, and it simply will not work.

(2) The literary structure of Gen 1 militates against a construct rendering of Gen 1:1. According to the over-quoted construct advocate, Ephraim A. Speiser, the P (Priestly) account of creation ends at 2:4a and the J (Jahwistic) account begins at 2:4b. He believes that Gen 1:1-3 parallels Gen 2:4b-7. However, Victor Hamilton reveals how jarringly unaesthetic this would be. If Gen 1:1 is a temporal dependent clause, then the additional facts are that verse 2 is a parenthetical comment, set off by hyphens from what precedes and follows; and the main clause appears in verse 3, “And God said . . . .” The result is an unusually long, rambling sentence, in itself not unheard of, but quite out of place in this chapter, laced as it is with a string of staccato sentences.

Hershel Shanks says we should reject the inferior quality of the construct for the majestic absolute rendering. The attempt by some translations to make Gen 1:1-3 into one long sentence is “a model of awkwardness” and “a clutter of thoughts crying to be sorted out,” which is instinctively off-putting. The main concerns behind the construct rendering are, in fact, resolved by an absolute one.

(3) The phrase “the heavens and the earth” is a merism that refers to the totality of creation. According to Hershel Shanks, many of the alleged problems for the absolute reading brought up by construct advocates (e.g., Speiser) are resolved by noting that the phrase “the heavens and the earth” is a merism—a rhetorical device referring to the extreme parts or to the first and last of something to represent the whole. In Genesis 1:1, the author is not telling us about the order of creation; rather, he is telling us that “God made the universe.” What is more, Shanks notes, if “heaven and earth” speaks of totality—thereby eliminating a primordial pre-existence—then even a construct reading of Gen 1:1 would imply creation out of nothing. Totality rather than organization is the chief thrust of this mer-
ism, as Claus Westermann affirms. The construct view appears even shakier. 

(4) Further support for this absolute reading (and #4 in particular) stems from the fact that this particular absolute view is the oldest view. Bruce Waltke lists “all ancient versions”—not to mention ancient commentators—as understanding Gen 1:1 as an “independent clause.” This absolute understanding of Gen 1:1 and its status as an independent clause is borne out by the Septuagint’s rendering as well (En archē epoiēsen ho theos ton ouranon kai tēn gēn. Hē de gēn . . . ; “In the beginning God created the heaven and the earth. And the earth . . .”), reinforcing the absolute beginning of the cosmos here. John 1:1 (En archē en ho logos; “In the beginning was the Word”) itself relies on the Septuagint rendering of Gen 1:1. First-century Jewish historian Josephus follows the absolute rendering of the Septuagint at the outset of his Antiquities: “In the beginning God created the heaven and the earth” (En archē ektisen ho theos ouranon kai tēn gēn). All ancient Greek versions of the Old Testament such as Aquila, Theodotion, Symmachus, as well as Targum Onkelos understand Gen 1:1 as an independent clause. Theophilus of Antioch (ca. A.D. 180) draws on the absolute reading of the Septuagint in To Autolycus (2.4): “In the beginning God created heaven” (En archē epoiēsen ho theos ouranon). Pseudo-Justin (A.D. 220-300) also cites the absolute rendering of the Septuagint of Genesis 1:1: “For Moses wrote thus: ‘In the beginning God created the heaven and the earth’ [En archē epoiēsen ho theos ouranon kai tēn gēn], then the sun, and the moon, and the stars.” Jerome’s Vulgate begins with the absolute rendering as well, treating it as an independent clause (In principio creavit Deus coelum et terram). Saadia Gaon’s tenth-century translation into Arabic takes Gen 1:1 as an independent sentence. The various versions and the pointing of the Masoretic Text imply that “this was the standard view from the third-century B.C. (LXX) through to the tenth century A.D. (MT).”

Therefore, all things being equal, preference should be given to antiquity. Presumably, those closest to the composition of Genesis 1 would be the better informed about its meaning. The overwhelming unanimity of “both the Jewish and Christian tradition” that the first word in the Bible is in an “absolute state” and that the first verse is “an independent clause” is remarkable. Other reasons could be adduced for understanding Gen 1:1 as absolute, but I shall stop here.

As noted above, a case can be made for a two-step view of creation—one in which God creates everything (“the heavens and the earth”) and the second, in which God prepares it for human habitation. In Creation Out of Nothing, William Lane Craig and I note that this view was held by medieval Jewish exegetes as well as the church fathers through Irenaeus and Augustine. This exposes a fallacy made by many LDS scholars: if God shapes matter as an Architect or Designer, then the “stuff” God uses must be eternally pre-existent. But this is a huge non sequitur. There is very good reason—especially given the Bible’s aversion to metaphysical dualism (since God alone is eternal or everlasting)—to embrace the idea that matter was itself brought into existence by God. Kenneth Mathews writes, “It is an unnecessary leap to conclude that the elements in v. 2 are autonomous, co-eternal with God and upon which he was in some way dependent for creation.” Brevard Childs remarks that some pri-
mordial dualism in Gen 1:2 is simply out of the question. Gerhard Hasel’s survey of the literature concludes by noting the unanimous support of the independent/main-clause reading of Gen 1:1 in light of the “combined efforts of lexical, grammatical, syntactical, comparative, and stylistic considerations.” Wenham writes, “most modern commentators agree that v 1 is an independent main clause to be translated, ‘In the beginning God created. . . .’” In light of Wenham’s analysis, Stephen Ricks’s pejorative remarks about “fundamentalist Protestants,” “rearguard actions,” and “members of great ‘yawning’ associations” who espouse ex nihilo creation actually are wide of the mark! Temporal readings of Gen 1:1 (#1 or #2) simply are, by and large, rejected by biblical commentators in favor of an absolute reading (#3 or #4).

The Implications of the Verb Bara’ (Create) for Creation Out of Nothing

Does the verb bara’, which is used for “create” in Gen 1:1 and elsewhere in the OT, imply creation out of nothing? Of course, bara’ is used for God’s creation of the people of Israel (e.g., Isa 43:15) or His creation of a clean heart (Ps 51:12). Even after God’s initial creation is complete (Gen 2:1), God creates indirectly by continuing to create all creatures and bring about His glorious purposes in history: “When you send your Spirit, they are created” (Ps 104:30). That said, we can still pick up strong signals from OT writers regarding the uniqueness of the word bara’ (despite the Septuagint’s obscuring it). So we must look more closely at this word. While we must be careful not to load it with more freight than it was meant to carry, we must not overlook its significance either.

The relevant uses of the term bara’ occur thirty-eight times in the Qal stem and ten in the Niphal stem. Note that we are not here considering the Piel stem (some scholars consider it a distinct verb and doubt its very connection to bara’ in the Qal or Niphal stems), which can mean “to cut, split” (Josh 17:15).

As an aside, the alleged etymology of bara’ (e.g., “cut,” “split”) will not be helpful here, despite the claims of some Mormons. As Moisés Silva emphatically states, “Modern studies compel us to reject this attitude [i.e., appealing to etymology as giving us the ‘basic’ or ‘real’ meaning of a word] and distrust a word’s history.” Similarly, Barr asserts, “The main point is that the etymology of a word is not a statement about its meaning but about its history.”

While bara’ by itself does not entail creation out of nothing, we should note its great theological significance. The cumulative result of the reasons given below is that bara’, in relevant contexts, does suggest creation out of nothing: (1) There is an utter absence of pre-existing material in connection with the verb bara’. As Werner Schmidt writes, this verb expresses that God “did not have need of already existing material . . . creation is deprived of any similarity to human action.” George Knight remarks that “God has given man the power to refashion stuff that is already there; but man cannot bara’; only God can create.” Childs notes that, while the end product is always mentioned, pre-existing material never is. This, in addition to the “simultaneous emphasis on the uniqueness of God’s action,” could not be brought into a “smooth harmony with the fact of a pre-existent chaos. World reality is a result of creation, not a reshaping of existing matter.” Childs concludes that creatio ex nihilo is implicit in Gen 1:1.
One may ask, why is \textit{bara’} used not only of the creation of the heavens and the earth (Gen 1:1) and of human beings (1:27), but also of great sea creatures (1:21)? Is this theologically significant? The answer takes us back to the ANE context, in which sea monsters would have been primeval forces that hindered a well-ordered cosmos. Genesis 1 implies that this is a false theological view. The verb \textit{bara’} here emphasizes that God created the sea creatures; they are not hostile forces to be reckoned with.\footnote{71}

(2) In view of the fact that God is always the subject of \textit{bara’}, this verb appears to be without analogy and refers uniquely to divine activity. Wenham comments, “it should be noted that God, the God of Israel, is always the subject” of \textit{bara’}.\footnote{72} Some will shrug this off by pointing out that \textit{bara’} is used in conjunction with other words not necessarily associated with divine activity, such as \textit{‘asah} (“make”) and \textit{yasar} (“form”); these appear to be interchangeable with \textit{bara’} (Gen 1:26, 27, 31; 2:3; Isa 43:1,7; 48:15). However, we must be careful of linguistic reductionism here and not assume that parallelsisms are purely synonymous. While such verbs may express facets or aspects involved in God’s creative work (e.g., God “made” man in his image), the verb “create” goes beyond what they express and communicates something further. According to Walter Brueggemann, “While it may be used synonymously with ‘make’ or ‘form,’ the verb ‘create’ is in fact without analogy. It refers to the special action by God and to the special relation which binds these two parties together.”\footnote{73} Karl-Heinz Bernhardt asserts that \textit{bara’} is used to express clearly the incomparability of God’s creative work. It refers to the “nonpareil work of the Creator God.”\footnote{74}

So even though \textit{bara’} is used in conjunction with other terms, this does not mean that they are fully equivalent and that \textit{bara’} has nothing significant to contribute beyond the verbs “make” (\textit{‘asah}) or “form” (\textit{yasar}). Indeed, creating may involve making and forming, but making and forming fall short of creating. John Hartley observes that \textit{create} refers to the creation of something \textit{new} by God; only God \textit{creates}. Other verbs (\textit{form}, \textit{make}) allow for “a variety of processes to come into play between God’s speaking and the object’s coming into existence.”\footnote{75} But \textit{bara’} uniquely captures the entirety and breadth of God’s creation—something these other supporting verbs fail to do.

(3) The uniqueness of \textit{bara’} is evidenced by its association with God’s powerful word. That God does not require pre-existing matter in order to create is further reinforced by His creating through His powerful word (cf. Ps 33:6). Wenham observes that while \textit{bara’} is not a term exclusively reserved for creation out of nothing, it preserves the same idea. The verb \textit{bara’} in Gen 1 speaks of the “absolute effortlessness of the divine creative action;” God creates merely by His will and word.\footnote{76} Von Rad declares, “It is correct to say that the verb \textit{bārā’}, ‘create,’ contains the idea both of complete effortlessness and \textit{creatio ex nihilo}, since it is never connected with any statement of the material. The hidden pathos of this statement is that God is the Lord of the world.”\footnote{77} Thus any eternal dualism is implicitly rejected.\footnote{78}

While \textit{bara’} does not automatically connote creation out of nothing in the context of Gen 1, its being “without analogy” is part of a cumulative case pointing in the direction of \textit{creatio ex nihilo}.\footnote{79} The idea of \textit{creatio ex nihilo} is implied in Gen 1:1 as no “beginning” for God is mentioned.\footnote{80} Thus
bara’ is a word best-suited to express the concept of creation out of nothing. In fact, no other Hebrew term would do.

(4) The verb bara’ in Gen 1:1 is connected with the totality of God’s creation (“the heavens and the earth”), which points us to creation out of nothing. Walter Eichrodt expresses the implicit assumption of the OT regarding absolute creation: “The idea of the absolute beginning of the created world thus proves to be a logical expression of the total outlook of the priestly narrator.” For example, Isa 40:21, which refers back to Gen 1:1 but utilizes the parallel expression “from the foundation of the earth,” is “a clear reference to an absolute beginning” and not an “arbitrary judgment.” Eichrodt considers the doctrine creatio ex nihilo as being “incontestable”—especially in light of the author’s strict monotheism as well as his radical distinction between ancient cosmogonies—in which the gods emerged out of pre-existing matter—and his own. Eichrodt argues that “the ultimate aim of the [creation] narrative is the same as that of our formula of creation ex nihilo.”

As Claus Westermann notes, Gen 1:1 refers to “The Beginning. Everything began with God.”

**Additional OT Texts Imply Creatio ex Nihilo**

Having looked at Gen 1:1, we should note other important OT passages reinforcing creation out of nothing. In them we witness the totalism as well as the contingency of God’s creation. Such a totalism (e.g., the merism “the heavens and the earth”) is to be expected since, in the Hebrew mind, there was no other kind of phenomenological existence outside the creative activity of God.

Proverbs 8:22-26 states that before the depths were brought forth (i.e., the “deep” of Gen 1:2), Wisdom was creating with God. Commenting on this passage, Richard J. Clifford notes that “the basic elements of the universe did not exist. There were no cosmic waters (v. 24), no pillars of the earth . . . and no habitable surface of the earth.” Nothing else besides the Creator existed—and this would preclude any pre-existent material. Thus, the reference made later in 2 Pet 3:5 (alluding to Gen 1), where God creates “from water,” assumes that the waters themselves were brought into existence by God. Thus we should not read into such a passage some eternally-existent “deep” based on Gen 1:2 (indeed, God created the “deep”; Ps 104:6; Prov 8:24, 27-8) any more so than we should see the “darkness” of Gen 1:2 as eternal and uncreated, since God creates both darkness and light (Isa 45:7).

In a passage that refers to “the beginning, before the world began,” (Prov 8:23b), we read,

When there were no depths I was brought forth,
When there were no springs abound-ing with water.
Before the mountains were settled,
Before the hills I was brought forth (Prov 8:24-25 NASB).

Proverbs 8:24, Michael Fox observes, assumes that the “waters” of Gen 1:2 are part of the process of creation. Their formation is a step/stage in creation. He observes the similarity in language between 8:26 (“Before the mountains were set down. . .”) and Ps 90:2 (“before the mountains were born . . . from everlasting to everlasting you are God”), concluding, “Prov 8 starts from the indisputable commonplace that God existed before the start of time and ascribes the same precedence to wisdom.”

Everything that exists independently
of God/Wisdom had a distinct temporal origin. Derek Kidner writes of Prov 8: “wisdom is both older than the universe, and fundamental to it. Not a speck of matter (26b), not a trace of order (29), came into existence but by wisdom.” Roland Murphy declares that the meaning of this passage is “clear”: “[Wisdom] is . . . preexistent to anything else . . . Wisdom was there before anything else.”

Psalm 24:1-2 speaks in sweeping terms about God’s creation: “The earth is the Lord’s and everything in it . . . for he founded it on the seas.” Or take Psalm 146, where we read that believers’ hope is to be “in the LORD their God”—that is, the God “who made heaven and earth, the sea, and all that is in them.” It is this God who “keeps faith forever” (Ps 146:5-6). In the various psalms in which creation is mentioned, God first creates an ordered cosmos for human habitation and then works out His redemptive plan through His people Israel. While creation is not the primary focus here, it serves as a backdrop for God’s saving actions in human history.

In addition, the notion of *creatio ex nihilo* is reinforced when Scripture declares the eternality and self-sufficiency of God in contrast to the transience of the finite created order. Psalm 102:25-27 speaks to the *everlastingness* of God as opposed to the *transience* of everything else:

> Of old you laid the foundation of the earth, and the heavens are the work of your hands. They will perish, but you will remain; they will all wear out like a garment. You will change them like a robe, and they will pass away, but you are the same, and your years have no end (ESV).

Leslie Allen comments, “Creator and creation are distinct: he is so much greater than they and must outlive them, as a man outlives his clothes. Unlike material things, Yahweh alone is immortal and immune from decay.” It would indeed contradict the mindset of biblical writers to say, “From everlasting to everlasting, You are God—although matter exists alongside You from everlasting to everlasting”!

Implicit throughout Isaiah 40-48 is the supreme sovereignty and utter uniqueness of Yahweh in creation, besides whom there was no other god—or anything else—when He created: “I am the first and the last” (44:6; cf. 48:12); “I, the Lord, am the maker of all things” (44:24); “I am the Lord, and there is none else” (45:18; cf. 46:9). God’s stupendous creative power is without analogy. Contrary to the LDS worldview, God sets himself apart as “creator and author of all things”—not merely organizer or arranger.

We observe there are simply no preexisting conditions to which God is subject; it is God’s commanding word that brings creation into being. Westermann notes that Isaiah’s emphasis on God *alone* as the Creator and sole God is by virtue not only of His being “greater and more powerful than all the rest” of Babylon’s gods, but “by being the one who remains (‘I am the first and the last’).”

The OT presents Israel as not so much concerned with the *ex nihilo* dimensions of creation as it was with the sovereignty of God over creation, of God’s absolute rule without competition, of the power of God’s word. However, their worldview took for granted that the contingent, temporal creation was utterly distinct from the everlasting, beginningless Creator and that God and what He brought into being
constitute reality. These assumptions point to creation ex nihilo—not creation ex materia. The reason creation out of nothing was not an explicitly-declared article of faith in the OT is because “there was simply no alternative.” That is, “there was no other reality than that established by God,” and thus the Israelites “had no need expressly to believe that the world was created by God because that was the presupposition of their thinking.” The very merism of totality—“the heavens and the earth”—expresses totality rather than simple organization. To say that God merely organized does not do justice to what this merism expresses.

So the cumulative case for creation ex nihilo in the OT is strong. Genesis 1, starkly set against the ANE cosmogonical context, supports creation out of nothing. God and creation are ontologically distinct and constitute all the reality there is. Also, Gen 1:1 is an absolute statement, not a temporal clause. Its absoluteness offers strong support for creation ex nihilo. Indeed, the majority of scholars today recognize that this absolute reading is not only grammatically and contextually preferable; it is also aesthetically superior. The verb bara’ (in certain contexts) lends further support to the idea of creation out of nothing. Its unique association with God and His word, its lack of connection with anything material, and its utter novelty make it a fitting expression of the idea of creation ex nihilo. And contrary to LDS assumptions, it is a non sequitur to say that if God formed or shaped the elements into an orderly cosmos, then they must be eternally existent. Apart from Jewish abhorrence to such a dualism, a two-stage creation, in which God creates His raw materials out of nothing (Gen 1:1) and then shapes them into a cosmos (Gen 1:2-31), is perfectly plausible. Finally, the contingency of the created order as well as the totalism expressed by the OT further attest to creation out of nothing. God created everything external to Himself. Without God, nothing else could exist. He must bring it into being, and He must sustain it in being. John Goldingay observes that any “First Testament thinker” addressing the question, “Where did matter come from” would “no doubt declare” that “Yhwh made it, of course.”

**NT Support for Creatio ex Nihilo**

Not only does the OT imply creation out of nothing, but the NT does as well. Markus Barth and Helmut Blanke declare that “the OT idea of creation” serves as a background to Paul’s affirmations about creation in the New. Childs affirms that “it is apparent that the Old Testament’s understanding of God as creator was simply assumed and largely taken for granted as true” by NT authors. He adds that the NT writers believed that “the world was not eternal” and that “God’s creative power encompasses everything.” This belief is aptly summarized in the phrase, creatio ex nihilo.

Robert Jenson affirms that NT writers and the primal church “simply took over Jewish teaching” on creation—one that did not need to be asserted, but functioned rather as warrant in asserting other things. Thus the absolute difference between Creator and creature is an automatic classification (Rom. 1.25; Heb. 4.3). “Creator” is simply equivalent to “God” (1 Pet. 4.19), and “creature” is simply equivalent to “everything” (Romans 8.19-39; Colossians 1.23).

This ontological distinction between Creator and creature is undeniable in Scripture, yet Mormon scholars are curi-
ously reluctant to acknowledge it.

One new twist, of course, is that the NT writers connected creation and Christology. In Christ’s sharing the identity of God as the Creator of the universe (e.g., 1 Cor 8:6) and in light of his resurrection, creation is now infused with the hope of restoration. Even so, the monotheism of the OT—with its rejection of an eternal dualism—is clear. As in the OT, the NT writers see God as the Creator of all, without whom there would be no reality distinct from Him. Obviously, the NT writers build on the OT.

Although the Greeks used a range of words for “creation,” G. Petzke notes that the NT and post-biblical Judaism follow the Septuagint in their avoidance of dēmiourgos (“demiurge”) for “Creator,” which “was common in the surrounding world.” What is remarkable is that, despite any Greek philosophical influences on biblical writers, the word dēmiourgos (translated as “builder”) appears only once in the NT (Heb 11:10), and this term is altogether avoided in the Septuagint. By contrast, “creator [ho ktisēs]” is the preferred term in the Septuagint and the NT. But even here—unlike Platonism—the word “builder” (dēmiourgos) does not suggest a lower status than that of creator. Rather, NT writers such as Paul regularly affirm the “essentially Jewish conception of the cosmos.” This is further borne out by the fact that the stock Greek word for unformed matter—hylē—is found only once in the NT—without any reference to unformed matter (Jas 3:5b).

Let us now briefly survey the NT passages relevant to, and entailing, creation out of nothing: (1) John 1:3: “All things came into being through Him; and apart from Him nothing came into being” (NASB). Referring to creation, John 1:3 utilizes sweeping and unexceptional language: “all things [panta]” came into being through the Word. Raymond Brown notes that here within the biblical text itself we see that “the material world has been created by God and is good.” The implication is that all things exist through God’s agent, who is the originator of everything. This is borne out by the fact that though the Word already “was” (ēn), the creation “came to be” (egeneto). So when Scripture speaks of God’s creation, there is an all-embracing nature to it. Klaus Wengst points out the obvious—namely, nothing out of all that exists is excluded. Ernst Haenchen affirms that any proto-Gnosticism, in which the material world was evil, is rejected in this passage. Rudolf Schnackenburg observes that in this passage the goodness of all created things is being defended since, in the work of creation, everything owes its existence to Him. In spite of his assertions of Hellenistic influences on NT writers, even Rudolf Bultmann declares that John 1:3 indicates that “everything that there is [panta]” is an affirmation in the strongest words possible that “everything without exception” has been made by the Logos: “the creation is not the arrangement of a chaotic stuff, but is . . . creatio ex nihilo.” (Ricks’ assertions notwithstanding, none of the cited scholars would qualify as “fundamentalist Protestants”!

(2) Romans 4:17: “[Abraham] is our father in the sight of God, in whom he believed—the God who gives life to the dead and calls things that are not as though they were” (NIV). As in Genesis (“Let there be . . .”), Paul speaks of God who “calls” all things into being. Paul is, according to James Dunn, operating from an undisputed “theological axiom.”
is, there is no precondition to God’s activity—whether it concerns creation, resurrection, or granting a child to an elderly infertile couple. Where there is death, God brings to life; where there is barrenness, God makes fruitful; in the case of creation, where there is nothing, God brings something into existence. Everything that exists is wholly dependent upon God for its being and continued existence.

Dunn explains the relationship between Paul’s understanding of creation and its connection with redemption in Romans 4:17:

Paul calls on this theological axiom not simply because it is a formula few if any of his readers would dispute, but because it clearly implies also the relationship which must pertain between this creator and his creation. As creator he creates without any precondition: he makes alive where there was only death, and he calls into existence where there was nothing at all. Consequently that which has been created, made alive in this way, must be totally dependent on the creator, the life-giver, for its very existence and life. Expressed in such terms the statement provides the governing principle by which all God’s relationships with human-kind must be understood, including salvation and redemption. Unless God is inconsistent, the same principle will govern God’s dealings as savior: he redeems as he creates, and he reckons righteous in the same way in which he makes alive. That is to say, his saving work depends on nothing in that which is saved; redemption, righteous-reckoning, is not contingent on any precondition on the part of the recipient; the dead cannot make terms, that which does not exist cannot place God under any obligation—which is to say that the individual or nation is dependent on the unconditional grace of God as much for covenant life as for created life. It was this total dependence on God for very existence itself which man forgot, his rejection of that dependence which lies at the root of his malaise (1:18-28).115

Otfried Hofius points out that Paul is drawing on the common connection made within the extra-biblical Jewish thought and literature of his day between creation out of nothing and the resurrection of the dead.116 Indeed, Hofius affirms that creation out of nothing in such passages “is not doubtful.”117 Robert H. Mounce explains the biblical concept expressed here and throughout Scripture: “By definition the Creator brings into existence all that is from that which never was. Anything less than that would be adaptation rather than creation.”118 Paul Achtemeier concurs, commenting that God will go to whatever lengths possible to fulfill His promises—even if this means creating something where before nothing at all had existed.119

Ernst Käsemann notes the “full radicalness” of the doctrine of justification, which is “an anticipation of the resurrection of the dead.”120 This deserves to be called “creation out of nothing.”121 Pointing to this passage, Bernhard Anderson asserts that the sovereignty of God as Creator does indeed entail the doctrine of creation out of nothing.122 Joseph Fitzmyer sees in this passage that the promise to Abraham was made by the all-powerful Creator God Himself, who “can bring about all things.”123 So Rom 4:17, even if it does not directly address creation out of nothing, certainly assumes it.

(3) Hebrews 11:3: “By faith we understand that the universe was formed at God’s command, so that what is seen was not made out of what was visible” (NIV). Church historian Jaroslav Pelikan sees this passage as “explicitly” teaching creation out of nothing.124 Indeed, it is one of the most powerful affirmations of creation out of nothing in the NT, despite
its being phrased negatively (“was not made”) rather than positively.

What is it that “cannot be seen”?

Craig Koester argues against the two common alternatives of (1) “nothingness” (some semi-substantial “non-existence”) and (2) the “transcendent realm” (reflecting Hellenistic notions that the visible is derived from the invisible world). He says that “what cannot be seen” corresponds to the powerful “word of God.”

Of course, such an interpretation would support creation out of nothing. In this passage, which reflects the thinking of Ps 33:6 (“By the word of the Lord, the heavens were made”), we read of the creative power of rhēmati theou—“the word/command of God.” This harks back to Heb 1:2-3, where God’s Word—namely, Christ—is the instrument by which God “created the universe.”

This reading is certainly possible, but it still does not capture the most natural reading of the text. The writer of Hebrews is not stating in positive terms that the world was made from something not visible. Rather, he puts it negatively—namely, that the world was not made from anything visible. Here, much turns on how the negative mē is taken, as the word order is unusual. Lane points out two alternative possibilities: (1) “so that what is seen was brought into existence from what cannot be seen,” or (2) “so that what is seen was not brought into being from anything that can be seen.” Lane, among others, opts for (2). He points out that the negative mē usually occurs before the word or phrase that is negated, and here it is the entire clause (“so that what is seen was not brought into being from anything observable”). The negative mē properly modifies the whole infinitival clause (eis to mē ek phainomenōn to blepomenon gegonenai), the eis to phrase having a final or purposive sense to it (“so that”). The thrust of this clause is a denial of the world’s having a visible source. Lane summarizes by saying that although Hebrews 11:3 does not state creatio ex nihilo in positive terms, but negatively, “it denies that the creative universe originated from primal material or anything observable.”

(4) Romans 11:36: “For from him and through him and to him are all things;” 1 Corinthians 8:6: “yet for us there is but one God, the Father, from whom all things came and for whom we live; and there is but one Lord, Jesus Christ, through whom all things came and through whom we live;” Colossians 1:16: “For by him all things were created: things in heaven and on earth, visible and invisible, whether thrones or powers or rulers or authorities; all things were created by him and for him” (NIV). The sweeping comprehensiveness of these passages (“all things”) resembles the OT worldview—with the addition of the cosmic Christ’s sharing in God’s identity. The sum total of reality is comprised of God/Christ and everything else (i.e., creation). Nothing is omitted.

According to Rom 11:36, “from [ek]” God and “through [dia]” him and to [eis] him are all things [ta panta].” In light of such a sweeping statement, it would seem odd to say that from, through, and to Him are all things—except primordial matter. Unoriginate matter would hardly fit in with such an assertion. Absolute creation makes the best sense of such comprehensive claims. It speaks with a totalism that God is “the source (ek), sustainer (dia), and goal (eis) of all things.” All things find their origin in God—not to mention their being sustained and directed by Him.

Some have suggested that this formulation in Rom 11:36 is akin to (and therefore
influenced by) Stoicism. However, we must be careful not to succumb to parallelemania. As Thomas Schreiner rightly observes, “the parallels are superficial since such formulations must be interpreted in terms of the worldview of the author, and Stoicism and Pauline thought are obviously different.” For example, the Stoic conception of God was pantheistic, but Paul’s understanding of God was personal and theistic.

Similarly, Paul’s language in 1 Cor 8:6 speaks with the same comprehensiveness of “Reality = God/Christ + Creation.” Richard Bauckham and James Dunn note that Paul splits the Shema of Deut 6:4 (“Hear, O Israel: The Lord our God, the Lord is one”). Paul affirms that Jesus is identified with Yahweh as the “one Lord” of Deut 6:4, and both Jesus and the Father are seen as bringing about the created order. Amazingly, the monotheistic Paul is making a dramatic pronouncement in “Christianizing” the Shema. The ta panta (“all things”)—like “the heavens and the earth” of Genesis 1 and elsewhere in the OT—refers to everything, the universe.

Even the word ktisis (“creation”), according to the second edition of Walter Bauer’s Greek lexicon, has the sense of “the sum total of everything created,” and this is borne out by the Creator-creation distinction made in Scripture (cf. Heb 9:11: “not part of this creation”). In the lexicon’s third edition, the word ktizō “create” is defined as “to bring something into existence.”

Colossians 1:16-17 speaks comprehensively as well when it declares that all things were created in and through Christ. The totalistic merism in Gen 1:1 (“the heavens and the earth”) is expressed in the phrase “all things [ta panta].” The mention of His having created all things “in heaven and on earth”—which corresponds to or parallels “things visible and invisible” (ta orata kai ta aorata)—indicates that these expressions “embrace everything for there are no exceptions.” Barth and Blanke observe that “things visible and invisible” should not be understood in a Platonic sense of the realm of appearance as opposed to the realm of Ideas or the Forms. Rather, in accordance with the Hebrew worldview (which had no word for “invisible”), we should translate such a passage as “what is seen and what is not seen.”

Barth and Blanke stress that the totality (ta panta) refers to the “entire creation” (comparable to the Hebrew kol, “all”): “In the viewpoint of [Colossians], everything that is not creator is represented as having been created.” What is expressed in Col 1:16 is in “striking contrast” to “Hellenistic statements” about the nature of creation.

We could refer to other portions of Scripture along these lines. Revelation 1:8 declares that the Lord is the enduring “Alpha and the Omega.” He is the One “who is and who was, and who is to come” (This, of course, echoes passages such as Isa 42:4; 44:6; 48:12; or Ps 90:2, where God alone—unlike matter—is “from everlasting to everlasting”). It is God, “who created all things” (Eph 3:9). Indeed, “you created all things and because of your will they existed and were created” (Rev 4:11). So the doctrinal formulation of creation out of nothing is, as Jürgen Moltmann puts it, “unquestionably an apt paraphrase” of what Scripture means by “creation.”

(5) 2 Peter 3:5 (NIV): “long ago by God’s word the heavens existed and the earth was formed out of water and by water”; 2 Peter 3:5 (REB): “there were heavens and earth long ago, created by God’s word out
of water and with water.” LDS scholars latch on to this verse as a proof-text for God’s creation from eternally pre-existent chaotic deeps or the primeval ocean.144

Rather than this being creatio ex aquis, however, 2 Pet is speaking more loosely when using the phrases “from [ek] water” and “by [dia] water.”145 Also, Schreiner suggests, the syntax here is complicated and unclear;146 so we should proceed with caution. Scientific considerations aside, it would be difficult to maintain that the author believed that the universe was made literally from water; it is utterly contrary to the biblical worldview that presents God alone as enduring and everlasting. Being the Creator of all things outside Himself, any eternal dualism is utterly unbiblical, and 2 Pet assumes this. Thus, while the NIV renders this verse, “long ago by God’s word the heavens existed and the earth was formed out of water and by water,” it is unlikely.147 Second Peter takes for granted the backdrop of Gen 1 and uses “heavens and earth” here as a merism for totality (cf. also v. 7: “the present heavens and earth”). Thus the NIV’s rendering is unlikely since it breaks up this unity. The more natural reading would unite “the heavens” and “earth.”

According to Gen 1, God organizes/orders the waters He Himself has brought into being, separating the waters to make clouds of the sky (Gen 1:6-8) and making the dry land by gathering the water together (Gen 1:9): “On the basis of the Genesis account, then, Peter’s assertion that God created the heavens and the earth ‘out of water’ does not seem far-fetched.”148 Indeed, “God used water as an instrument in his creation of the sky.”149 Schreiner suggests that when Peter says that the world was formed ex hydatos (“out of water”), he probably has in mind the emergence of the earth and sky from these waters.150 The phrase “through [dia] water” refers to God’s using water as an instrument in forming the world, suggesting a two-step creation process.151

What is Peter’s point? He makes a parallel by bridging two uses of water in the Pentateuch to show that things have changed since the creation of the world. God spoke, using the division of water to create the sky, but he also used water to destroy the world—again, just by His divine decree.152

So we must be careful of pressing the preposition ek/ex (“out of”) too far. After all, the Scriptures reinforce that God is indeed the ultimate source of all things, and the preposition ek/ex is often used in the NT to convey this (e.g., Rom 11:36: “from [ek] Him . . . are all things”). Barth and Blanke state that whereas the Stoic Seneca might use “from” [ek/ex] to refer to the material out of which something is produced, biblical writers such as Paul use it to designate the Creator.153 Paul himself—not to mention 2 Pet 3:5—utilizes many overlapping prepositions for God’s creative actions; so we must be cautious about “dogmatic differentiations” as well as drawing Hellenistic connections that simply are not there.154

Given the loose and even “confusing”155 use of prepositions in this passage, it is unwise to read into them some cosmological theory—especially since God’s dividing the waters above and below in the creative process (Gen 1) would suffice to account for this language, as Jerome Neyrey suggests.156 In addition, we must allow for Peter’s rhetorical purposes: “One of the main reasons he introduces the idea of the world as being created ‘by water’ is to prepare for the parallel he will make in verse 6, where God destroys the
world ‘by water.’” In v. 5, God creates the world (in the second of two stages, as we have seen) by His word; then in v. 7, God judges it “by the same word.” Thus we have a fitting parallel. So this passage, to which LDS scholars frequently appeal to support God’s allegedly creating out of eternally pre-existent watery chaos, misses the point.

The NT, then, mirrors the OT’s understanding of creation. Apart from the important NT addition of the cosmic Christ, the Pantocrator, the same creation themes are reiterated. The sweeping totalistic picture of God as the Creator of all and the fact of creation’s contingency in contrast to God’s self-existence (John 1:3, Rom 4:17; Heb 11:3; etc.) forcefully present creation out of nothing. Second Peter 3:5 should not be taken as supporting creation ex materia since the OT suggests God’s creation of everything (including the waters/deep, darkness) and then later division of them in the latter stage of this two-part event (as Gen 1 indicates). Indeed, the cumulative weight of evidence from the OT and NT leads to a strong case for creation ex nihilo.

Concluding Remarks

What conclusions may we draw in light of LDS claims and their conflict with Scripture’s affirmations regarding creation?

First, the idea held by ancient Greek and contemporary Mormon thinkers alike that there can be independent, eternally pre-existent matter co-existing with God—a metaphysical dualism—is to affirm a form of idolatry, compromising both the ontological distinction between Creator and creature and the nature of divine sovereignty. That is, such a dualism attributes an eternal, independent ontological status to something other than God, and it entails that something external to God limits or constrains his creative activity. Basil of Caesarea pointedly affirms in his Hexaemeron, “If matter were uncreated, then it would from the very first be of a rank equal to that of God and would deserve the same veneration.”

Second, the LDS claim that God cannot destroy or create the elements/matter undermines the power of God: it would be by pure luck that God ended up creating at all since the raw materials just happened to exist alongside Him from eternity! Church historian Eusebius challenged those claiming that matter was eternally pre-existent to tell him “whether it does not follow from their argument that God by lucky chance found the substance unoriginate, without which, had it not been supplied to Him by its unoriginate character, He could have produced no work at all, but would have continued to be no Creator.”

Third, Mormons, following Gerhard May, tend to confuse implicit with ambiguous. While arguments for creation out of nothing are often implicit in Scripture, this hardly means they are ambiguous. In fact, an argument can have great power—even though implicit. A father might tell a son, “Either I am mowing the lawn, or you will have to do it—and I’m not mowing the lawn.” The father’s point is far from ambiguous, and, while implicit, it is quite forceful with no question remaining as to what is meant.

When we apply this point to creation out of nothing, we can affirm, “Either creatio ex nihilo is true, or God did not create everything. But Scripture says that God created everything.” When the Bible declares that God created everything, it implicitly affirms that creatio ex nihilo...
is true; the matter is not ambiguous. Or consider this: “Either creatio ex nihilo is true, or God is not all-powerful. But God is truly all-powerful.” Again, God’s being all-powerful strongly suggests creation out of nothing. Though it is implicit in Scripture, it is not ambiguous.

Fourth, even if the biblical evidence were ambiguous and the biblical writers took no position on this issue, the LDS idea that God created from eternally pre-existing matter does not win by default. Rather, this position has its own burden of proof to bear. Mormons give the impression that an either-or situation exists regarding creation: either the Bible explicitly teaches creation out of nothing or the creation ex materia view is true by default. However, one must deal contextually and exegetically with the biblical texts, offering positive evidence for the ex materia position. The idea of creation from pre-existent matter would not automatically be true, even if the Bible were actually unclear on the matter.

Happily, we have no need of that hypothesis.

ENDNOTES

5Ibid.
7Incidentally, I have met and have had very cordial interactions with Prof. Ricks; I trust that Ricks will engage the ideas of the book—and perhaps even concede to overstatement!
8For details regarding the biblical, extrabiblical, philosophical, and scientific support for creation ex nihilo, I refer readers to the book mentioned above.

13In a personal correspondence (20 April 1998), Stephen Robinson writes, “I would not be comfortable with saying that God cannot bring eternal matter into being nor destroy it.” Rather, “God creates matter out of chaos and can return it to chaos, and that chaos is not matter as we know it, but a level of existence that human beings cannot comprehend. For
me chaos is not matter, but neither is it non-existence"
